Information Technology
Distinction

EXPERIENCE

Senior Technical Designer
TT Games, Knutsford

Designing, prototyping and scripting gameplay activities for the next LEGO open-world adventure.

Technical Designer
Splash Damage, Bromley

Worked on Transformers Reactivate within an AAA team, designing, prototyping and developing implementation workflows for open-world features and balanced vehicle gameplay.

Senior Designer (Technical)
Red Kite Games, Leeds

Contributed to FBC Firebreak, adapting Control gameplay into a multiplayer FPS experience, designing and prototyping new features during pre-production with a medium-sized team.

Technical Level Designer
Ubisoft, Düsseldorf

Worked on Assassin's Creed Nexus VR, providing technical assistance to designers, prototyping mechanics, and creating and maintaining mission scripting blocks aligned with design goals.

Designer (Technical)
Team17, Wakefield

Designer on a range of in-house and external projects across engines and genres. Prototyped game concepts and acted as Team17's design point of contact for feedback.

Games Tester
Rockstar, Lincoln

Tested Rockstar games in the RAGE engine for quality on PS4, Xbox One and PC.

SELECTED PROJECTS

Transformers Reactivate Unreal Engine 5
Created Blueprint standards documentation and drove its adoption. Owned the Open Worlds team: documentation, designs and systems.

Assassin's Creed Nexus VR Unity
Reimagined the Assassin's Creed formula for VR. Responsible for the gameplay blocks used for missions, ensuring a smooth transition into VR.

FBC Firebreak Northlight Engine
Multiplayer, live-service spin-off of Control. Adapted Control to a multiplayer setting, scripting in Lua.

Advanced First Person Character Unreal Engine
Popular tool sold on the Unreal Marketplace. The basis of modern first-person games, increasing usability for designers without technical skills.

Luck Screen Android, Unreal Engine 4
Casual puzzle/pattern mobile game. Solo developed and released on the Google Play Store.
